## SG Granite Outdoor Edition

Astroturf? No, thanks. If we have it our way, something a bit fancier is in order. There's just one thing that mustn't be forgotten and that's a generous helping of style, as well as a surface feel that turns sunbathing into a wellness experience. And that's what makes the SG Granite Outdoor Edition the perfect outfit for sophisticated outdoor and wet areas. Made from specially coated, UV-resistant and colourfast polyester fibres, this stylish outdoor edition will turn any outdoor lounge, pool area or open air café into a special location. Additionally, special recesses in the backing ensure that water can run off unhindered. And if that was not enough, the dichromatic thread of the SG Granite ensures that the rug has the same unique, shimmery glow that makes the indoor edition a real head-turner.

Range of application:	outdoor (residential & public): terraces, open air cafés, pool areas, spas, trade shows & events
Material (pile & base):	100% polyester
